

Codebreaker

The Story of Alan Turing
The Father of Computer Science

*"Alan Turing's life story reads as if it were a tragic fiction.
A great mind, an athlete, an eccentric, a hero of the Second World War,
father of computer science and of artificial intelligence, a code breaker and, finally, a victim of prejudice.
To me his short life encapsulates many of the great changes of the 20th century."*
- Dr. John Graham-Cumming

Special Screening with Producer Q&A
Thursday, April 11th at 8PM
MTCC Auditorium
